Talk it, Solve it.

To help get young children thinking and talking about maths and thinking logically, BEAM Education have brought out a new range of books called **Talk It, Solve It**.

There are three titles in the **Talk It, Solve It** series covering Key Stages 1 and 2. Each book has been developed by the experts at BEAM Education in conjunction with numeracy consultants and teachers working in Bracknell Forest LEA.

Reasoning skills are a fundamental, but often neglected part of both the Primary mathematics and language curriculum but they are absolutely essential in daily life, and the earlier children start the better. The **Talk It, Solve It** series aims to get children thinking and talking logically about numbers and shape.

Each activity in the book has been specifically designed for pair or group work to encourage discussion, collaborative problem solving, rational thinking and listening. The activities are all photocopiable and come complete with solution sheets and teacher's notes. Each book is accompanied by a CD-ROM containing all of the photocopiable pages which can be projected onto a whiteboard for whole class use.

Talk It, Solve It Years 1 & 2; Talk It, Solve It Years 3 & 4; Talk It, Solve It Years 5 & 6 are all priced at £22.50 each or buy all 3 books for the special price of £59.50 (excludes handling and delivery charge). To order contact BEAM on 01242 267945 or buy online at www.beam.co.uk
