

**Number Challenges Galore – now for the whole class!**

BEAM is pleased to announce the release of three new **Number Challenge Interactive** CD-ROMs.

Teachers working with the renewed primary mathematics Framework need to ensure children get plenty of rehearsal and recall practice in their number skills. **Number Challenge Interactive** can help them do this, in a way that is truly engaging for children. Maths takes on a whole new perspective with **Number Challenge Interactive** as children track down pirates' treasure or fly away on a magic carpet whilst practising their mental calculation and rapid recall. Working in pairs or set against the computer, remembering the facts is not enough. Children will have to devise a good playing strategy to win!

With four games on each CD-ROM **Number Challenge Interactive** is packed with maths questions focused on key calculation skills. Each game can be set at two levels, providing children with a wealth of mathematical practice and challenge. The games are invaluable for playing with children of all abilities, including low-attaining children as booster practice.

**Number Challenge Interactive** has been developed from BEAM's twelve highly successful Number Challenge board games. The board games have become classics, used in thousands of classrooms throughout the country. Now with **Number Challenge Interactive** teachers can share the games with the whole class on the interactive whiteboard or on the computer.

**Number Challenge Interactive** is available in three CD-ROMs set at Apprentice, Brainbox and Champion levels to reflect progression through the primary age group:

Apprentice: For Years 2 and 3 (Key Stage 1 & 2)

Brainbox: For Years 3 and 4 (Key Stage 2)

Champion: For Years 5 and 6 (Key Stage 2)

Each CD-ROM is available at £85.00 + VAT each. The price includes a site licence.

Buy all three **Number Challenge Interactive** CD-ROMs for £195.00 + VAT.

## Notes to editors

- ◆ **BEAM Education**, a Nelson Thornes company, is a specialist mathematics education publisher dedicated to promoting the teaching and learning of mathematics as interesting, challenging and enjoyable.
