

Hands-on Maths with Hands-on Number Bonds Interactive

Now you can share number bonds with the whole class on an interactive whiteboard thanks to BEAM's latest release.

Hands-on Number Bonds Interactive is a fabulous new interactive CD-ROM for the Foundation Stage and Key Stage 1. Using these dynamic tools and ready-made lessons, teachers can model combining and partitioning sets of objects with young children. Features include:

- toolbox with choice of scenarios, counting objects, digits and curtain to hide and reveal
- 24 prepared lessons, three levels of difficulty
- offers four different models of addition and subtraction word problems
- downloadable recording sheet for children
- teachers' notes

Based on BEAM's popular *Hands-on Number Bonds* boxed activity sets, ***Hands-on Number Bonds Interactive*** is an invaluable resource for practitioners and teachers to demonstrate and discuss with children addition and subtraction problems with young children. They can use the same familiar scenarios from the boxed *Hands-on Number Bonds* activity sets – people on buses, apples on trees, kittens playing with toys and frogs on lily pads – or choose from a wide range of alternative scenes such as bugs on leaves or jewels in treasure chests.

Hands-on Number Bonds Interactive is great value at £69.50 + VAT. Price includes a site licence.

Notes to editors

- ◆ **BEAM Education**, a Nelson Thornes company, is a specialist mathematics education publisher dedicated to promoting the teaching and learning of mathematics as interesting, challenging and enjoyable.
