

On a Mission to Improve Mental Maths? Try Mission Maths

BEAM has now developed the popular *Mission Maths* board game into something for the whole class to share with ***Mission Maths Interactive***.

Children can now rehearse maths facts and definitions or do quick calculations and problem solving in a dynamic environment on the interactive whiteboard or computer. Playing as individuals, in pairs or with the whole class in teams players will seek to complete their chosen mission. You can take on each other or even the computer, so there is no reason for children to miss out on the action and thrills of watching their scores rise. They can't make too many mistakes, without losing all of their lives.

Mission Maths Interactive comes with 1200 new questions covering number, problem solving, measures and shape across two levels of difficulty. The teacher can select whether to offer the whole range of questions or narrow down the choice to hone children's skills in a particular maths strand. So players can compete to improve their maths rapid recall across a range of subjects in a way that will leave them craving their next mission!

Mission Maths Interactive is priced at the £99.00 + VAT. Buy *Mission Maths* and *Mission Maths Interactive* together for £120.00 + VAT. ***Mission Maths Interactive*** is suitable for use on pcs and Macs and the list price includes a site licence.

Notes to editors
