

A whole-school approach to problem solving!

We Can Do It!

By Peter Clarke

Mathematical problem solving involves using previously acquired mathematical understanding, knowledge and skills and applying these to solve problems arising within everyday life. Our new **We Can Do It!** books feature problems and challenges that stimulate genuine mathematical thinking.

- Six books, one for each year, allow a whole-school approach to using and applying maths
- Each book provides 36 challenges, with resource sheets and answers supplied, giving a problem-solving challenge for each week of the school year
- Each challenge is matched to the strands of the renewed Framework to fit seamlessly with planning
- Assessment for Learning pointers are included to easily identify learning needs and ensure children are progressing
- Differentiation, with ideas for extension and support, provides for the individual needs of each child
- A CD-ROM is included with each book, containing all the resource sheets to print out

'Practical ideas for assessing children's ability to use their knowledge' BEAM trialling teacher

We Can Do It! Year 1	ISBN: 978 1 9062 2445 5	£35
We Can Do It! Year 2	ISBN: 978 1 9062 2446 2	£35
We Can Do It! Year 3	ISBN: 978 1 9062 2447 9	£35
We Can Do It! Year 4	ISBN: 978 1 9062 2448 6	£35
We Can Do It! Year 5	ISBN: 978 1 9062 2449 3	£35
We Can Do It! Year 6	ISBN: 978 1 9062 2450 9	£35
