

you need:

- 1-6 dice
- 2 small counters or cubes

Square numbers

First of all

Put your counters on 0.

When it's your turn

Roll the dice and move your counter that many spaces.

- You can move in any direction
- You can't change direction in the middle of a turn

- If you land on a square number, say what number it is the square of, and write your initials by that number in the list below
- You can't land on the same number as your opponent. Go in a different direction.

The end of the game

Go on until one player has collected five square numbers. They win.

Number	1	2	3	4	5	6	7	8	9	10
Name
