

you need:

- counters in two colours (14 of each)

Total 100 for 2 players

First of all

Decide who has which colour counter.

When it's your turn

Choose two numbers that total 100.

Put a counter on each of these two numbers.

The rest of the game

Go on until the counters run out.

Now each player removes ONE of their opponent's counters.

Who has made the longest up-and-down line? They win.
